PROJECTS & EXPERIENCE

Frontend Developer — Axia Africa

September 2025 - December 2025

- Built a comprehensive learning platform using Tailwind CSS and React.
- Designed and developed a responsive UI with a landing page, dashboard, courses page, assignment tracking, and profile management.
- Implemented authentication systems using DummyJSON and implemented multiple REST APIs.
- Utilized Fetch API for asynchronous data handling and state management.
- Implemented error handling and edge case testing for API integration.
- Built reusable React components with a consistent design system and auto-layout principle.
